### By American (3 mars)

The US administration has announced several new actions intended to ease supply-chain disruptions and aid domestic manufacturers in order to reduce U.S. reliance on foreign imports. It plans to issue a new “Buy American” rule that would allow the federal government to pay more for certain “critical” domestic-made products.

### Thales (3 mars)

En 2021, Thales a atteint son plus haut niveau de commande (19,9 Mds€) particulièrement dans les segments défense et sécurité (11,18 Mds€) et aérospatiale (5,6 Mds€) et son bénéfice a été de 1,09 Md€, contre 483M€ en 2020. Pour 2022, Thales anticipe un chiffre d'affaires compris entre 16,6 Mds€ et 17,2 Mds€. L'impact de la guerre sur le chiffre d'affaires 2022 à destination de la Russie et de L'Ukraine est estimé à environ 100M€.

### FAA - Technical Advisory Board (3 mars)

The FAA is expanding its use of independent Technical Advisory Board (TAB) reviews for both aircraft and drone projects. These are independent groups of internal and external safety experts. The FAA formed a TAB during the Boeing 737 MAX recertification and has established another for the Boeing 777X certification review.

## Spatial

### **Arianespace (4 mars)**

Arianespace is suspending all Soyuz launches operated by Arianespace and Starsem, the joint venture the company shares with Russia that commercializes Soyuz launches.

### **One Web (3 mars)**

OneWeb will stop using Russia's Soyuz rocket and is considering American, European, Indian and Japanese rockets to launch its remaining 220 satellites.

### **Space Flight Laboratory (28 février)**

Space Flight Laboratory, along with two other suppliers, has won a NASA Rapid Spacecraft Acquisition IV indefinite-delivery, indefinite-quantity contract to deliver small satellites to NASA and other U.S. government agencies.

### **York Space Systems/ Northrop Grumman / Lockheed Martin (28 février)**

The Space Development Agency has signed contracts (\$1.8 billion) with York Space Systems, Northrop Grumman and Lockheed Martin for its first mission-capable data-relay satellites. Each company will develop and build 42 prototype satellites for launch beginning in September 2024.

### **Astroscale (17 février)**

Astroscale is maneuvering its ELSA-d servicer spacecraft closer to the client spacecraft. ELSA-d is an End-of-Life Services demonstration mission, validating the technologies involved with debris docking and removal. The spacecraft successfully demonstrated its ability to capture a client spacecraft during a magnetic capture test in August.

## Innovation

### **Agilyx/Virgin Group (28 février)**

Virgin Group has partnered with Agilyx to research and develop a new sustainable aviation fuel based on waste plastics, and build production facilities. Agilyx's technology breaks down the plastics into a synthetic crude oil by pyrolysis. Virgin Group expects to use the fuel as part of its stated goal of achieving net-zero carbon emissions by 2050.
